

Course Information

Course Code: CS-08519

Credit Hours: 4 (3+1)

Lab Hours/Week: 3

Course Title: **Computer Networks**

Lecture Hours/Week: 3

Pre-Requisites: **None**

c. Lab Contents Computer Networks

- Orientation & Introduction
- Lab outline
- Basic Commands (Ipconfig, Ping, tracert, netstat etc.)
- IPV4 introduction (Subnet Mask, Default Gateway etc.)
- Networking Cables implementation (Straight through & Cross over)
- CISCO Packet tracer overview.
- Networking Devices introduction.
- Connectors (RJ45,RJ11)
- Implementation of LAN topologies using Packet tracer
- Router CLI (command line interface), Router Basic Commands,
- Implementation of DNS using Packet tracer.
- Implementation of DHCP server using Packet tracer
- Implementation of DNS on server & DHCP on router using Packet tracer
- Switching :**
 - Implementation of Intra VLAN configuration.
- Implementation of Inter VLAN configuration
- Implementation of spanning tree protocol
- Implementation of rapid spanning tree protocol

Mid Exam

- Routing:**
- Implementation of static routing
- Implementation of dynamic routing (RIP protocol)
- Implementation of dynamic routing (OSPF protocol) Implementation of EIGRP (protocol)
- Management of CISCO Router's IOS back up, Restoration of IOS Backup by Disaster Recovery method using Packet tracer
- Implementation of frame relay configuration

- Access list only one host can telnet R2 router blocking single host to telnet multiple networks by extended access list.
- Access list extended blocking http service.
- Access list 2 (blocking a whole network) blocking a one host to ping another host, blocking a host to access FTP service from server.
- Implementation of static and dynamic Natting
- Final Viva

Final Exam
