1. Rehan Ahmed

Online Data Collection and Tracking

- How personal data is collected and tracked online
- Implications for privacy and security

2. Faiq Aqleem

Privacy Rights

- Definition and importance of privacy rights
- Types of privacy rights: confidentiality, anonymity, etc.

3. Taha Salman

Data Protection Laws

- Overview of data protection laws and regulations
- Examples: GDPR, CCPA, etc.

4. Javeria Saleem

Data Minimization and Anonymization

- Techniques for minimizing and anonymizing personal data
- Benefits for privacy and security

5. Yumna Noor

Data Breach Notification

- Why data breach notification is crucial
- Best practices for notification and response

Our Visit to Biafo Tech Software House

Introduction

On April 17th, our group of five students visited Biafo Tech Software House, and had the chance to chat with some professionals there. Each of us got to ask five questions about our topic. We talked about things like using software the wrong way and how it affects people. The people at Biafo Tech had a lot of good insights to share, which helped us understand our topic better.

- **Online Data Collection and Tracking:**

Biafo Tech showed us how our online actions leave traces, like cookies and tracking pixels. Knowing this helps us understand how our info gets gathered and used.

- **Privacy Rights:**

We learned about our rights to keep personal info private. Things like giving consent and knowing how our data is used help us stay in control.

- **Data Protection Laws:**

Biafo Tech explained laws like GDPR and CCPA. These laws help keep companies in check and give us more control over our info.

- **Data Minimization and Anonymization:**

Keeping data small and anonymous is key to staying safe. Biafo Tech taught us ways to limit what info is collected and how to make it harder to trace back to us.

- **Data Breach Notification:**

If there's a data breach, it's important to know ASAP. Biafo Tech showed us how companies should tell us about breaches so we can protect ourselves.

During our visit, we asked the professionals at Biafo Tech our questions and learned a lot from their answers. Now we know how to protect our info online and why it matters. By understanding these lessons, we can all play a part in keeping our personal info safe in the digital world. This presentation shares what we learned and the best practices we discovered.

We hope this presentation will help others understand the importance of protecting personal information in today's digital world.

Online Data Collection and Tracking

Rehan Ahmed

1. What is online data collection?

Online data collection is gathering personal info through websites, apps, or online services.

2. How do companies collect personal data online?

Companies collect data through forms, cookies, tracking pixels, and social media plugins.

3. What are cookies and tracking pixels?

Cookies are small files stored on your device, while tracking pixels are small images that track your online activities.

4. Can companies collect personal data without consent?

No, companies need your explicit consent to collect your personal data.

5. How must companies inform individuals about online data collection?

Companies must clearly explain what data they collect, why, and how they use it.

6. What is the purpose of online data collection?

Online data collection helps improve user experience, provide targeted ads, and gather analytics.

7. Can individuals opt-out of online data collection?

Yes, you can opt-out of online data collection at any time.

8. How must companies protect personal data collected online?

Companies must implement security measures to protect your data.

9. Can companies share personal data collected online with third parties?

Yes, but only with your consent and for specified purposes.

10. How do companies use online data collection for targeted advertising?

Companies use your data to create targeted ads based on your interests and online activities.

11. Can individuals access and correct personal data collected online?

Yes, you can access, correct, and delete your personal data.

12. How must companies comply with data protection laws for online data collection?

Companies must follow laws like GDPR and CCPA to protect your data.

13. What is the role of a Data Protection Officer (DPO) in online data collection?

A DPO ensures companies comply with data protection laws.

14. How must companies review and update their online data collection procedures?

Companies must regularly review and update their procedures to ensure compliance.

15. Are online data collection and tracking applicable to all companies?

Yes, all companies that collect personal data online must follow data protection laws.

Privacy Rights

Faiq Aqleem

1. What is the right to privacy?

The right to control your personal information.

2. How do individuals exercise their right to access personal data?

By requesting to see their personal data from companies.

3. Can individuals correct inaccurate personal data?

Yes, by asking companies to correct it.

4. Under what circumstances can companies deny privacy rights requests?

If requests are unlawful, excessive, or impinge on others' rights.

5. How must companies verify the identity of individuals requesting privacy rights?

Companies verify the identity of individuals by checking identity through reasonable means.

6. What is the right to be forgotten?

The right to ask companies to delete personal data.

7. Can individuals opt-out of personal data collection?

Yes, by telling companies not to collect their data.

8. How must companies inform individuals about their privacy rights?

Clearly and transparently, through privacy policies and notices.

9. Can companies charge a fee for privacy rights requests?

Only in limited cases, and it must be reasonable.

10. How quickly must companies respond to privacy rights requests?

Without delay, and within a reasonable time (e.g., 30 days).

11. Can individuals appeal privacy rights decisions?

Yes, through internal appeals processes or external dispute resolution.

12. How do privacy rights apply to minors?

Companies must protect minors' personal data with extra care and obtain parental consent.

13. Can companies discriminate against individuals who exercise privacy rights?

No, companies must not retaliate or discriminate against individuals who exercise their privacy rights.

14. How must companies protect personal data from unauthorized access?

Through appropriate technical and organizational measures (e.g., encryption, access controls).

15. Are privacy rights absolute?

No, privacy rights are balanced against other rights and interests (e.g., freedom of expression, public interest).

Data Protection Laws

Taha Salman

1. What is the main goal of data protection laws?

To protect personal information and privacy.

2. Which law is known as the General Data Protection Regulation?

The EU's GDPR (General Data Protection Regulation).

3. What is the California Consumer Privacy Act (CCPA)?

A California law giving consumers rights over their personal data.

4. Who is responsible for implementing data protection laws?

Companies and organizations that handle personal data.

5. What is the purpose of the Health Insurance Portability and Accountability Act (HIPAA)?

To protect individuals' medical records and health information.

6. Which countries have adopted data protection laws?

Many, including the EU, US, Canada, and Australia.

7. How often must companies review their data protection policies?

Regularly, to ensure they are up-to-date and effective.

8. What is the penalty for non-compliance with data protection laws?

Fines, legal action, and reputational damage.

9. Can companies share personal data without consent?

No, unless required by law or with explicit consent.

10. How do data protection laws define personal data?

Information that identifies or relates to an individual.

11. What is the role of a Data Protection Officer (DPO)?

To ensure companies comply with data protection laws.

12. How do data protection laws apply to online services?

They require online services to protect users' personal data.

13. Can individuals access their personal data under data protection laws?

Yes, individuals have the right to access and correct their data.

14. How must companies notify individuals in case of a data breach?

Promptly, clearly, and with information on what happened and what to do.

15. Are data protection laws applicable to all companies?

Yes, if they handle personal data, regardless of size or industry.

Data Minimization and Anonymization

Javeria Saleem

1. What is data minimization?

Data minimization is collecting and processing only the personal data needed.

2. Why is data minimization important?

It reduces privacy risks and protects personal data.

3. How can companies implement data minimization?

By collecting and processing only necessary data and deleting unnecessary data.

4. What is anonymization?

Anonymization makes personal data unidentifiable to protect privacy.

5. How does anonymization protect personal data?

It makes data impossible to link to an individual.

6. Can companies share anonymized data with third parties?

Yes, as it no longer constitutes personal data.

7. How must companies ensure data minimization and anonymization?

Through policies, procedures, and regular reviews.

8. What is the role of a Data Protection Officer (DPO) in data minimization and anonymization?

The DPO ensures companies comply with data protection laws.

9. How do data protection laws apply to data minimization and anonymization?

Laws require companies to implement these practices to protect personal data.

10. Can companies use data minimization and anonymization for online data collection?

Yes, to protect users' personal data.

11. How must companies document data minimization and anonymization procedures?

Clearly and transparently, with records of implementation.

12. Can companies be exempt from data minimization and anonymization requirements?

Rarely, and only if they can demonstrate alternative protections.

13. How do data minimization and anonymization apply to big data and analytics?

Companies must implement these practices to protect personal data in big data and analytics.

14. What are the consequences of failing to implement data minimization and anonymization?

Fines, legal action, reputational damage, and loss of trust.

15. Are data minimization and anonymization applicable to all companies?

Yes, if they handle personal data, regardless of size or industry.

Data Breach Notification

Yumna Noor

1. What is a data breach?

A data breach is when personal information is accessed, disclosed, or stolen without authorization.

2. How quickly must companies notify individuals of a data breach?

Without undue delay, and within a reasonable timeframe (e.g., 72 hours).

3. What information must companies include in a data breach notification?

Description of the breach, personal data affected, consequences, measures to mitigate, and contact information for further info.

4. Who must be notified in case of a data breach?

Affected individuals, regulatory authorities, and sometimes law enforcement.

5. Can companies delay notification if requested by law enforcement?

Yes, if it would impede a criminal investigation.

6. How must companies notify individuals if contact information is compromised?

By alternative means, such as public notice or media publication.

7. What are the consequences of failing to notify individuals of a data breach?

Fines, legal action, reputational damage, and loss of trust.

8. How must companies document data breaches?

Thoroughly, including facts, effects, and actions taken.

9. Can companies notify individuals of a data breach via email?

Yes, if email is the primary means of communication.

10. How must companies protect individuals affected by a data breach?

By offering support, such as credit monitoring or identity theft protection.

11. Can companies be exempt from data breach notification requirements?

Rarely, and only if the breach is unlikely to result in harm.

1. How do data breach rules apply internationally?

Companies must comply with the laws of the countries where the breach occurred.

13. What is the role of a Data Protection Officer (DPO) in data breach notification?

The DPO ensures compliance with data protection laws and regulations.

14. How must companies review and update their data breach notification procedures?

Regularly, to ensure they are effective and compliant.

15. Are data breach notification requirements applicable to all companies?

Yes, if they process personal data, regardless of size or industry.
